

Nest Norway Spruce

Picea abies 'Nidiformis'

Height: 24 inches

Spread: 5 feet

Sunlight: ○ ● ●

Hardiness Zone: 3

Other Names: Norwegian Spruce, Bird's Nest Spruce

Description:

A small dense spreading shrub which develops a characteristic depression in the center (hence the name), very unlike the species; forms a neat compact evergreen ball, adaptable and hardy; excellent choice for form and texture in the garden

Ornamental Features

Nest Norway Spruce is a dwarf conifer which is primarily valued in the garden for its ornamental globe-shaped form. It has rich green evergreen foliage which emerges lime green in spring. The needles remain green throughout the winter.

Landscape Attributes

Nest Norway Spruce is a dense multi-stemmed evergreen shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance shrub that will require regular care and upkeep. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Nest Norway Spruce is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

Planting & Growing

Nest Norway Spruce will grow to be about 24 inches tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub performs well in both full sun and full shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
