Height: 15 feet

Spread: 12 feet

Sunlight: ○

Hardiness Zone: 2

Other Names: Mugho Pine, Swiss Mountain Pine

Description:

This perfectly formed christmas tree displays an exceptionally consistent habit and the tenacious constitution of the species; foliage is a rich green with a hint of blue-green; highly adaptable to climatic and enviromental conditions

Ornamental Features

Tannenbaum Mugo Pine is a dwarf conifer which is primarily valued in the landscape for its distinctively pyramidal habit of growth. It has dark green evergreen foliage. The needles remain dark green throughout the winter.

Landscape Attributes

Tannenbaum Mugo Pine is a dense multi-stemmed evergreen shrub with a distinctive and refined pyramidal form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance shrub that will require regular care and upkeep. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Tannenbaum Mugo Pine is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Tannenbaum Mugo Pine will grow to be about 15 feet tall at maturity, with a spread of 12 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
